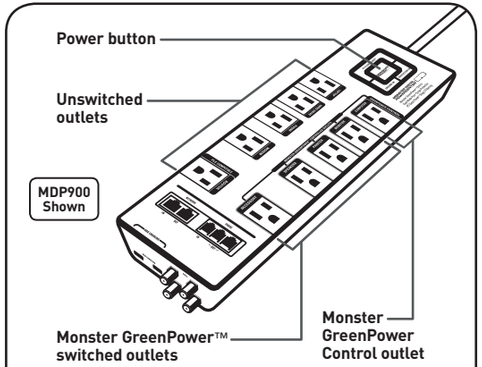
Instructions and Warranty Information

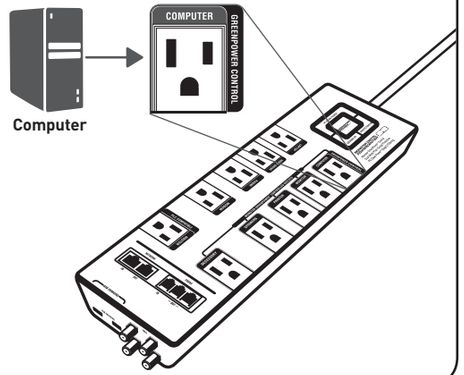
MONSTER GREEN POWER™ OUTLET MANAGEMENT

Monster GreenPower™ is a revolutionary new way to automatically reduce energy waste and save money. Simply plug your computer or other electronic device into the Monster GreenPower Control outlet. When it's turned off or goes to sleep, the Monster GreenPower outlets switch off, automatically eliminating energy wasted by peripherals, monitors, HDTVs, and more, when you're not using them. When your computer or device turns back on, the GreenPower outlets automatically power up again.

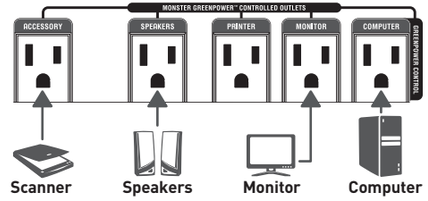


NOTE: Use the Power button to turn manually off all outlets on the PowerCenter.™

STEP 1: Connect your computer or other device to the "GREENPOWER CONTROL" outlet.

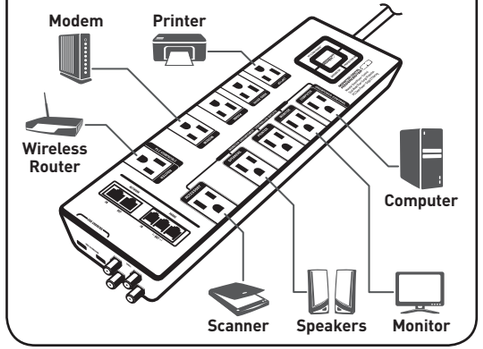


STEP 2: Connect devices such as scanners and monitors to the "GREENPOWER CONTROLLED OUTLETS" so they won't use power when your computer is powered off or in sleep mode.

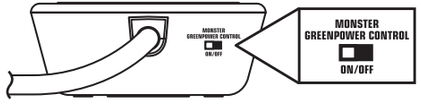


NOTE: The outlets on your Digital PowerCenter™ are labeled for your convenience. It will not harm your equipment to plug it into an outlet that's labeled differently.

You may want to keep your wireless network and printer on so others can use them while your computer and other devices are off. Plug devices that you want to keep on into the unswitched outlets.



If you don't want any outlets to automatically switch off, Monster GreenPower can be disabled by the switch located on the end of the PowerCenter.



If you are using PowerLine Communication, HomePlug® or similar networking device that uses your home's electrical wiring for data communications, it must be plugged into the outlet labeled PLC Compatible. The filters on the other outlets will block PLC network communications.
